ORTHO TRACK

WALKING TRACK SYSTEM

PRODUCT CATALOGUE

BUILT FOR YOUR BODY

DESIGNED FOR YOUR EVERYDAY

ORTHO TRACK

ABOUT **US**

Orthotrack is engineered around one simple idea: movement should feel better A next-generation walking and jogging track designed to be easier on every step, **effortless to maintain**, and **built to perform** for years. Created for active adults who value comfort over competition, **stability over speed**, and everyday movement over personal-best times. Because the best track isn't the one that pushes you harder. It's the one that **helps you keep moving**.

Every Step Counts

Turn every step into a healthier, happier life with Orthotrack

IDEAL **FOR**

PARKS

RWA & COMMUNITIES

WELLNESS ARENAS

WALKING TRACKS

SCHOOLS & CAMPUSES

Engineered **for Every Step**

VOC Free
Anti-Slip Texture
Anti Algae & Moss Formulation
No Lead & Mercury
DPUR Technology
20% Renewable Resources

KEY **BENEFITS**

Engineered for comfort. Designed for a healthier, more active you.

- Less Joint Impact
- Improves Heart Health
- UV Stable Colors
- Low Maintenance
- Weather Resistant

ORTHO TRACK

BUILT FOR
A BETTER YOU

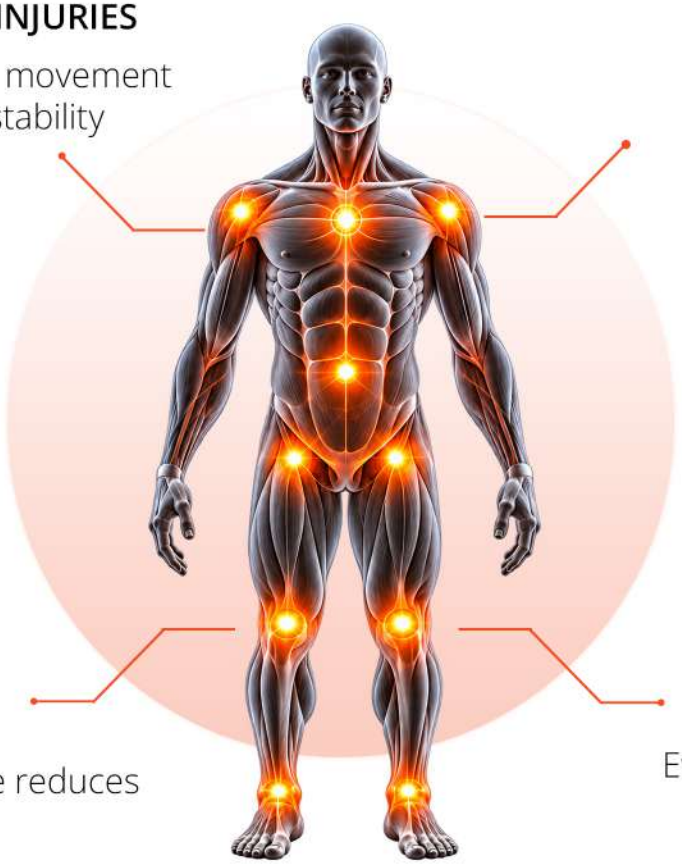

SCIENCE IN EVERY STEP

REDUCES RISK OF INJURIES

Minimises sideways movement for better grip and stability

BETTER POSTURE

Encourages natural alignment & spinal health.

LESS KNEE PAIN

Cushioned surface reduces stress on joints.

STRONGER MUSCLES

Even surface support helps build strength effectively.

30% LESS IMPACT ON JOINTS

20% BETTER CARDIO EFFICIENCY

25% REDUCTION IN STRESS LEVELS

TWO SURFACES
A CLEAR DIFFERENCE

ORTHO TRACK

ORTHOTRACK

TRADITIONAL WALKING TRACKS

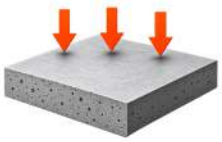

ORTHOTRACK		TRADITIONAL WALKING TRACKS
CUSHIONED COMFORT Reduces impacts on joints	JOINT SAFETY	**HARDER IMPACT** More stress on joints
UV STABLE COLORS No yellowing. Looks new for years	DURABILITY	**FADING COLORS** Prone to fading and dullness
EASY TO CLEAN Smooth surface, dirt dosen't settle.	CLEANLINESS	**TRAPS DIRT** Open texture holds dust,moss & algae
QUICK RECOAT Refreshes easily, looks new	MAINTENANCE	**HARD TO MAINTAIN** Patches are visible
LOW MAINTENANCE Simple care, long life	LONGEVITY	**SHORTER LIFESPAN** Wear out faster
BETTER VALUE Higher performance Lower lifetime cost	VALUE	**HIGHER COST** Costly installation and maintenance

System Construction

THE SIX-LAYER BUILD-UP

Each layer performs one job adhesion, cushioning, pore-filling, refinement, protection or finish so the finished surface performs as a system, not a single product.

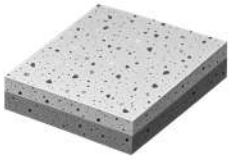

PREPARED SUBSTRATE + PRIMER

Establishes the adhesion interface and helps consolidate residual surface dust and loose particles.

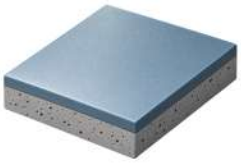

SHOCK-ABSORBING CUSHION

The confirmed system feature a genuine 15mm primary resilient cushion layer, not a thin coating.

PRIME LAYER

Refines the surface profile and establishes a more uniform plane before the wear surface is applied.

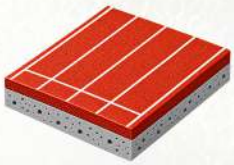

PORE-FILLING

Progressively fills surface voids and consolidates the granular SBR structure ahead of finishing.

PROTECTIVE TOP-COAT STAGE(S)

Builds surface protection and durability, contributing to the final finish.

FINAL COLOURED / WEAR FINISH

The walking wear surface colour and engineered texture / slip resistance, finalised per project

Technical Data Specifications

PROPERTY	SPECIFICATION / STATUS
SYSTEM TYPE	Multi-layer cushioned walking surface
PRIMARY APPLICATION	Outdoor walking tracks / wellness paths
INTENDED ACTIVITY	Walking and light recreational activity
CUSHION LAYER	15mm SBR shock-absorbing cushion
FINISH	Coloured seamless coated finish
SURFACE TEXTURE	Smooth to textured; project dependent
COATING TECHNOLOGY	Water-based coating technology
SUBSTRATE	Prepared concrete / suitable existing walking-track substrate
SLIP RESISTANCE	***Test value to be established***
IMPACT ATTENUATION	***Test value to be established***
ABRASION RESISTANCE	***Test value to be established***
UV / WEATHER RESISTANCE	***Test value to be established***
VOC	***Test / SDS value to be established***
SERVICE LIFE	***To be determined from testing and project conditions***
